EXPERIENCE

System Administrator
Crafton Tull and Associates
January 2023 – Current

- **Administered and optimized vSphere environments, including provisioning new servers, assigning storage, monitoring system performance, and applying critical patches.**

- **Played a key role in migrating to a hybrid Microsoft 365 domain, including mailbox and resource migration, as well as implementing appropriate tenant-wide policies.**

- **Led the deployment of BitLocker encryption via Group Policy to enhance company-wide data security posture.**

- **Configured Synology NAS to be utilized by vSphere via iSCSI.**

- **Directed comprehensive backup operations using Commvault, a backup solution that performs similar functions to Veeam, including creating and enforcing storage policies, installing clients on new servers, performing data recoveries, and participating in disaster recovery exercises to ensure business continuity.**

Network Specialist
Complete Computer Solutions
June 2022 – January 2023

- **Installed new network infrastructure, including routers, switches, and access points, while ensuring seamless setup for client environments.**

- **Administered Active Directory, Group Policy, network shares, SharePoint, and Exchange/O365 environments for clients. Oversaw a successful client project involving migrating from physical to virtual domain controllers.**

- **Configured and maintained firewalls, VPNs, and wireless access points to meet client needs.**

- **Managed and maintained various customer systems, documenting all changes in IT Glue Platform.**

IT Analyst / Media Technology Specialist
Osage Casino
July 2017 – June 2022

- **Coordinated large-scale Audio-Visual projects for casino and hotel site branches, reducing operational impacts.**

- Administered complex AV systems with tools like Crestron, ZonePro, Audio Architect, and Sonifi.

- Managed 25+ multicast channels, configuring video encoders and players in collaboration with the network team.

- Supported live events, working closely with touring performers' sound and video engineers.

- Provided level 2 application and network support to users.

SKILLS

Technical Skills:

- **VMware/vSphere: Cluster management, SAN integration, performance optimization**

- **Microsoft OS: DHCP, DNS, domain controllers, server roles administration**

- **Active Directory: User/group management, GPO configuration, security policies**

- **Microsoft 365: M365 administration, hybrid exchange management, tenant migration,**

- **Backup & Recovery: Veeam, Commvault (storage policies, client installation, folder recoveries, disaster recovery)**

- **Networking: Unifi (routers, switches, APs), SonicWall VPN, VLANs, firewalls (whitelists/blacklists)**

- **Scripting and automation**

- **Security: Mimecast, BitLocker, Sophos AV, Kaspersky, Windows Defender**

Soft Skills:

- **Project management, cross-department collaboration, communication**

- **Troubleshooting and analysis, time management, crisis management**

EDUCATION

Associates of Arts and Science
Northern Oklahoma College – December 2021

Bachelor's in Technology (Expected)
Oklahoma State University – Expected December 2026

Certifications:

- **CompTIA Security +**
